

## USM Inos Box

**A new range of products consisting of boxes and trays will be available for the Inos internal organization system. The boxes, made of polyester, create a warm contrast to USM's metal furniture. They are built to USM's dimensions and its philosophy of modularity, making them as adaptable as the furniture itself.**

### Stacking

Several boxes can be stacked on top of each other with the help of trays, which can also be used as covers or serving trays, or to hold assorted small items around the home.

### Dividers

Using dividers – powder-coated metal panels – a box's interior can be flexibly configured into smaller compartments. The dividers are available in graphite black and light gray.

### Applications

The boxes are perfect accessories for the USM Haller modular furniture system. Thanks to a variety of configurable sizes and the ability to create smaller compartments with dividers, the boxes bring order to many aspects of domestic life: They can sort silverware, organize magazines, hold textiles and cosmetics in the bathroom, or store toys in the children's room.
