USM Haller E

Application Options

A modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes to form a circuit. USB chargers or light sources can be snapped into place in pre-cut recesses. The power supply is drawn from any point near the ground. The power supply cable is attached to a Haller e-Ball, and the power adapter is subsequently tucked underneath the furniture until only the operating switch remains visible. From this point the power supply requires no further cables but rather is integrated into the structure of the furniture.

- 1 **Glass Panel**
Glass elements can be illuminated throughout.
- 2 **Without Metal Paneling**
Compartments without metal paneling can be completely illuminated.
- 3 **With Metal Paneling**
Compartments with metal paneling can be illuminated from the front.
- 4 **Compartment with an Extension Shelf**
The entire compartment with an extension shelf can be illuminated.
- 5 **Drop-Down and Extension Door**
Via the "Light When Compartment Is Open" function, the light automatically turns on when the door is opened.
- 6 **Angled Shelf**
The presentation space is illuminated from the front.
- 7 **Floor Lighting**
With floor lighting, the light shines at a 25-degree angle under the furniture.
- 8 **Ambient Lighting**
The light is directed vertically towards the back, illuminating the surroundings with a warm glow.
- 9 **e-USB Charger**
It can be integrated in the same places as the e-Lights.
